DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

1.Group I, claim(s) 1-5, 9-16, 18 and 20, drawn to a method for producing a capsular polysaccharide from an encapsulated bacterium.

Group II, claim(s) 6-8 and 19, drawn to a method for recovering a polysaccharide from a fermentation broth.

Group III, claim(s) 17, drawn to a pharmaceutical composition.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

- 2. The technical feature of Group III is a pharmaceutical composition. The technical feature is anticipated by Kuo J US Patent No. 4,220717 September 2, 1980. Kuo teach a pharmaceutical composition comprising a polysaccharide or polysaccharide conjugate (see abstract, column 4 lines 50-55).
- 3. The technical feature of Group I is a method of use of a pharmaceutical composition of the technical feature of Group III.
- 4. The technical feature of Group II is a method of use of a pharmaceutical composition of the technical feature of Group III.

The technical feature of Group III, a pharmaceutical composition is known in the art. Group I lacks unity with Groups II-III, because the technical feature of Group I is anticipated by the art and therefore not "special" within the meaning of PCT Rule 13.2

Application/Control Number: 10/571,600

Art Unit: 1645

because it does not provide for a contribution that the claimed invention makes over the art.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nina A. Archie whose telephone number is 571-272-9938. The examiner can normally be reached on Monday-Friday 8:30-5:00p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner supervisor, Jeffrey Siew can be reached on 571-272-0787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
